

What is Cloud Accounting?

If you are used to internet banking, you may not have realised it, but you are already accessing the cloud. Checking your balance at any time with the confidence that the information is secure and up to date is probably second nature. Moving to a Cloud accounting bookkeeping option will give your business this and so much more.

What are the benefits to my business of moving my accounts to the cloud?

Clients that have moved onto one of our cloud accounting options have told us that they are enjoying:

"Having a clear picture of my financial position in real-time"

"Being able to view my accounts on a range of devices"

"Automatic updates so I can focus on doing what I should be doing and enjoy"

"Knowing that there is no software to install and everything is automatically backed up"

"The relief of knowing I don't have to worry about software costs, server failure, upgrades and maintenance".

Having surveyed the marketplace, Rostrons have teamed up with market leaders, Quickbooks and Xero, to offer a range of cloud options to suit your business.

If you would like to know more about how Cloud Accounting could help your business or which software provider would work best for you, please do get in contact with us.
